

NORTHERN COUNTIES TRANSPORT SOCIETY

WHERE THE ! * ! * ! ARE THEY

PRINTED & PUBLISHED BY N.C.T.S. 44, Stanwell Rd., Swinton, Manchester, M27 1TD.

INTRODUCTION

The N.C.T.S. would like to make plain the fact that NO AUTHORISATION is given by them to visit any depots or stabling points mentioned in this publication, nor is this booklet any authority

THIS BOOKLET IS FOR REFERENCE ONLY !

Permits should be obtained wherever possible from Area Managers.

Visits to Dock Areas, should be with a permit from the Harbour Authority concerned.

Persons who attempt to "bunk" depots may be liable to prosecution, and will also jeopardise the issue of permits to organised partys.

The aim of this booklet is to inform you of practically every place in the Country where locos may be found. We don't list those places where locos/shunters go to 'once every blue moon'.

Unless otherwise stated locos are to be found every day of the week.

USE OF THIS BOOKLET

For each depot mentioned, we then list the stabling points and the number of shunters (if any) stabled there, and also the places where they are most likely to be found.

eg. SPRINGS BRANCH

N. WESTERN STN.	1	Station Pilot
-----------------	---	---------------

This means that there is an SP shunter stabled on N.W. Stn.

Shunters and locos can be seen either from the main road, or Station Yards, or even on a train.

Where there are no remarks, shunter/locos are at the afore mentioned Stabling point

During the winter months some Stabling points may not be in use, due to the fact that they are out in the wilderness. Locos can be found on main depots (Frost Precautions) NB Locos do need refueling and may have to return to main depots and will not therefore be found at Stabling Points

ABBREVIATIONS

STN	Station	C.S.	Carriage Sidings
N.C.L.	National Goods Carriers Ltd.	F.L.T.	Freight Liner Terminal
GD	Goods Depot	N.S.E.W.	North, South, East & West.
P.W.	Permanent Way Depot	C.C.D.	Coal Concentration Depot.
